

The Shutdown of the HVAC

All the HVAC (heating, ventilation, air conditioning) equipment **in the entire Buildings A and B** will gradually be shut down **between 8 p.m. on January 15, 2016 and 12 noon on January 16, 2016** because of the necessary modification of measurement and control software.

In addition, all the HVAC equipment **in the SE wing of Building A** will be shut down **between 8 p.m. on January 15, 2016 and 8 p.m. on January 17, 2016** because of HVAC regulation.

Therefore, we ask all the staff in Buildings A and B to adjust their work to this exceptional situation and to reduce all the work at laboratory fume hoods for this period.

For more information, please contact Jan Janoušek – Ext. 291.
