

Targeted Research Groups

I.

In compliance with Article IV of Director's Order 10/2012, targeted research groups were evaluated in October and November 2013 with the following conclusions:

1. The indicators agreed have been fulfilled within project resolution by the following groups, which will continue in their activities:
 - Neuroprotectives (Dr. Kudová)
 - Antiobesity Peptides (Dr. Maletínská)
 - Antimicrobial Peptides (Dr. Čerovský)
 - Drug Delivery Systems (Dr. Kraus)
 - Helquat Chemistry and Biology (Dr. Teplý)
2. As it has not been possible sufficiently to narrow the complex issues under resolution and focus on a specific outcome during the first year of operation, I cancel the target research group Transport and Diagnostic Nanosystems (Dr. Ledvina) as of December 31, 2014. In the course of 2014, the group will complete the individual tasks of the unfinished project.

II.

As of January 1, 2014, I establish a new target research group on the basis of the research plan submitted, namely:

Steroidal Inhibitors – 370/37

Leader – Martin Kotora
Prchalová Eva
Štěpánek Ondřej

Prague, December 5, 2013

RNDr. PhDr. Zdeněk Hostomský, CSc.
Director
