

Director's Order

21/2011

Re: Establishment of the Bioinformatics Scientific-Service Team

With effect as of **January 1, 2012**, I establish the **Bioinformatics** scientific-service team. The establishment of this team has been discussed and recommended by the Board of the IOCB.

The purpose of the establishment of the Bioinformatics team is the creation, maintenance and expansion of the database of biomedically relevant molecules as part of the ELIXIR project and the establishment of a national ELIXIR node at the IOCB. The other scientific and service activities of the team include bioinformatic screening, the creation of 3D protein models, structure analysis, the study of protein interaction with materials, the application of bioinformatics and computational methods.

The main prerequisite of the further existence of the team is its active participation in the ELIXIR infrastructure project and the sustainable financing connected with this project. The team shall prepare the background documents for the IOCB's participation in the project, including the technical resolution and co-financing in cooperation with the NREN. If the team fails to receive the ELIXIR infrastructure project, its activity will be ended.

1. I appoint RNDr. Jiří Vondrášek, CSc., as the team leader with a 1.0 workload.
2. The team members shall be:
 - a. RNDr. Ota Bludský, CSc., with a 1.0 workload
 - b. Mgr. Jiří Vymětal, with a 0.4 workload
 - c. Mgr. Jiří Kysilka, with a 0.4 workload
 - d. Bc. Boris Fačkovec, with a 0.2 workload
 - e. Jan Hermann, with a 0.2 workload
 - f. RNDr. Jiří Polách, PhD., with a 0.2 workload
 - g. Helena Černá, with a 0.2 workload
3. The workloads of the employees above will be reduced by the respective part in the current team and the wages funds will be transferred to the newly established Bioinformatics team.
4. The work areas will be allotted from the areas of the current team in the original extent.

Prague, December 21, 2011

RNDr. Zdeněk Havlas, DrSc.
Director
