

RE: Appointment of the **Methodological Council of the IOCB**

The Methodological Council of the IOCB is an advisory body of the director. The Director of the Institute will request consultations with the Methodological Council primarily when planning the purchase of new apparatuses and when evaluating the usage of the existing equipment of the institute in the areas of the responsibility of the individual members. The members of the Methodological Council are authorised to submit their own proposals for the improvement of the equipment of the workplaces and for the effective usage of the existing equipment to the director.

During the preparation of the reconstruction and construction of the complex, the members of the Methodological Council will cooperate with the Deputy Director for the construction and participate in the specifications of the preparations of the area in the scope of their competence, they will propose through the Deputy Director the layout and equipment of the workplaces to the project designers.

The members of the Methodological Council are authorised to convoke sessions with further employees of the institute for the purpose of specifying their positions.

I appoint the following as the members of the Methodological Council from the relevant fields:

Organic Chemistry:

Doc. Ing. **Michal HOCEK**, DSc

Biochemistry and Molecular Biology:

RNDr. **Michal MAREŠ**, CSc.

Computational Chemistry:

Prof. Ing. **Pavel HOBZA**, DrSc.
